Ted,

I hope you are feeling better. When I called your assistant indicated you had been sick all week -- my family has been battling flu bugs since November -- we have almost won.

I called to talk to you about a company called iviewit. Early last year we conducted some technical due diligence on encoding technologies and iviewit, was one of the few who stood out. I understand that you have had a chance to connect with them, and it was through mutual friends and contacts that Chuck Brunelas suggested that we link up to share information on the company, and extend the dialogue we have been having with iviewit to you and your team.

They have a strong technology and licensing play with patent pending technology in two areas: a still image zooming process that offers flexible magnification, and a mathematical scaling process for video. We have been very supportive of the technology and have passed the info to John Calkins, VP Strategic Planning to consider iviewit from the investment side.

I would be happy to share my perspective or discuss the technology at your convenience.

Thanx,
David
