---

Eliot,

Please send me a copy of the final invoice and I will make a check payable to the provider directly. Please let me know if you want the check mailed to you or directly to them.

We will be closing the Legacy account and transferring the money to the custody account I mentioned to you in my prior email. Please send the checkbooks and registers to my attention at the address below.

**Janet ~ You sent us already \$1469 in November expenses for this Volvo servicing based on the estimate, we took the car in and the quote is below for service at 3024.83, we need to pay this to get car out of service. I heard from Rachel that you will now be in charge of the Legacy acct and bill paying so I am not sure of how you want to handle. I can write a check from Candice's account for the 1479 we set aside already and then how would you like to cover the difference of \$1555.83, would you like to pay them direct or wire me the balance and should we have the final bill made to Bernstein Family LLC and sent to you with us as a copy? Let me know on car soon as we have to return the rental and let me know if you would like me to send over the Legacy check books and registers of Rachel's she dropped off here. Best ~ Eliot**

Upon Multi Point inspection of vehicle we check for worn or damaged parts and found that the 2 left front and 2 right front suspension control arm bushing are showing signs of wear and are starting to separate. The cause of failure to these bushing are from wear and not damaged as we see no sign of impact on worn parts. If parts (control arm bushings) are not replaced and tires are replaced and a 4 wheel alignment is performed when alignment is performed and vehicle is not moved and still on alignment rack alignment will show it's perfect. As vehicle is moved and driven around and normal driving is done in time alignment will shift and may cause premature tire wear. We can not determine length of time of control arm bushings being worn and starting to fail. Vehicle was in our shop on 07/03/12 with 58698 miles and was not noticed at that time.

Thank You,

Mike Marino \* Service Advisor
