Gentlemen,

Per our conversation,the following is the pricing for iviewit to develop the first 2 courses and future courses moving forward that use the same template as approved by Broadband. New course development will be subject to "development pricing" on a per course basis.

Development Course Pricing: $ 45,000 per course (1st 2 courses, and new courses different from the original template. This will be mutually agreed to upfront on a per course basis.

Additional Course Pricing(Wholesale to Broadband): $ 25,000 per course (estimated)

iviewit will be creating an " a la carte" pricing schedule by functionality within the next week as the pilot course is finished and approved by Broadband to determine additional course pricing. We would like to understand the time frame for future course rollout to plan internal resource allocation for Broadband related projects. We have been told of the potential of 300 courses based upon our discussions with Jason.

We will be calling you at 1:00 EST tomorrow, Thursday to finalize the terms of our agreement.

Sincerely,

Guy T. Iantoni   Kevin J. Lockwood
