## Accommodations

### Independent Living & Amenities

Patients live in upscale, comfortable, independent living quarters. Security is enhanced by entry gates at the apartment complex and individual apartment security systems. Staff is on duty at the apartment community throughout the evening and night hours. Patients have immediate access to them via phone at all times.

Each apartment is complete with washer/dryer, telephone, television, bed linens and kitchen utensils. ARC patients do their own grocery shopping and prepare their own meals. Patients are also responsible for doing laundry and keeping their apartments clean.

Apartments are strategically located within the community to provide each patient with an excellent opportunity to learn to lead an active, productive and sober life. Patients have access to on-site tennis courts, a swimming pool, and fitness center. In addition, we offer membership at two off-site, private health clubs. ARC has two massage therapists at the center for patients. Apartments are convenient to the beaches, shopping and recreation, and are approximately 7 miles from the treatment facility. Residences have easy access to public transportation to provide various opportunities for employment, education and volunteer work.

Clients are transported to the center and to twelve step meetings on a daily basis. Transportation is also provided for weekly shopping trips and scheduled recreation activities, including health club access.
